# OUR ICON WORK IN TRAINING MATERIAL MANAGEMENT

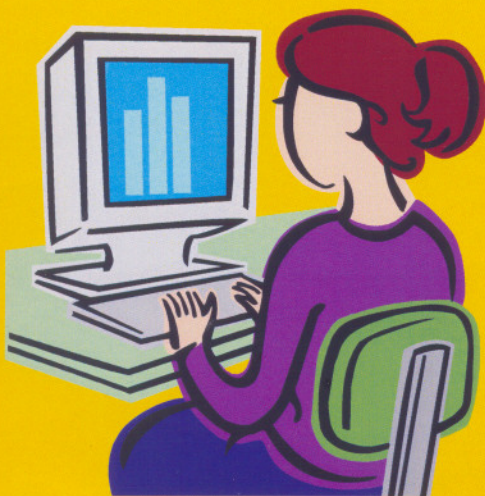

COE was launched in 2005 in 12 institute in Maharashtra. Out of these 3 institute are selected for production & manufacturing sector. Since it was new concept for all, no training material & text books were available in market. To overcome this problem we have taken challenge to prepare training materials & text books.

To fullfill the above challenge following tasks were performed:-

Conference was held on February 2006 in I.T.I aundh to prepare the model manuals of training material in the sector of production & manufacturing. Our target was to make manuals of **Basic milling & Gear cutting & Basic CNC & hydraulics Pneumatics**.

We are first in country to produced text materials in English & Marathi

Now these training materials are used in about all COE's in our state.

**NEARLY 20 INSTITUTES, 40 INSTRUCTORS & 2500 TRAINEES PER YEAR ARE GETTING BENEFITS OF OUR TRAINING MATERIALS.**

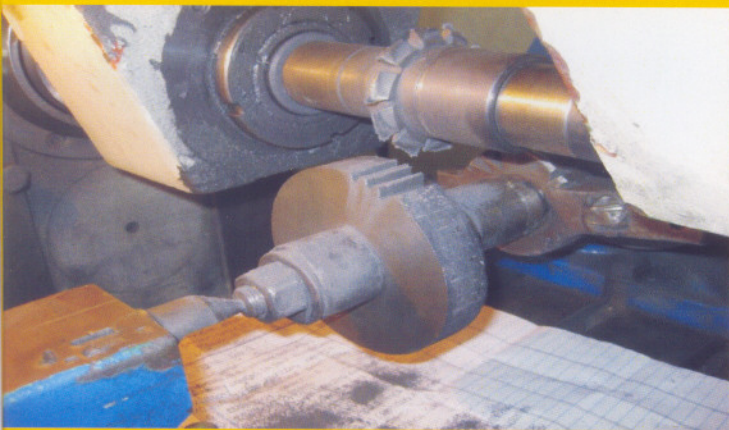

# OPTIMUM UTILISATION OF INFRASTRUCTURE TO MEET INDUSTRIAL DEMAND

Pimpri-Chinchwad industrial zone is the biggest in Asia. In this hub industries demand of skill worker is more. Our pass out per year is about 120 in advance courses & other trades is 200.

Our institute have already multi-skilled staff, full equipped workshop with latest technology & advanced machinery.

Our IMC chairman & committee members had taken decision to fulfill the demand of industries to have a trained manpower.

In this concerned we decided to start additional third shift in our institute to match the demand. So given the permission to run third shift as autonomus basis & this proposal will be put shortly for Directors order.

## ACTIVITY FOR RESOURCE GENERATION.

IMC chairman Mr. P.R. Bapat & his team decided in our IMC meeting to utilize the available machines & men upto optimum.

We are linked with about 425 industries like Thermax Ltd, Sandvik Asia, Alfa Laval & TATA motors etc.

These industries can give their outsourcing work to us.

Considering these things we have planned to:-

- 1). CNC machining :- All four machines will run about 20hrs per day which can generate revenue about 38 lakhs.
- 2). CAD-CAM :- We are procuring Pro-E , catia & Uni-Graphics. With the help of above advanced & existing softwares we planned to generate revenue about 15 lakhs from software training & 5 lakhs from Project work as below:-

- 3). Adv. Welding :- By using CNC profile cutting, Tig & Mig welding , microplasma welding & universal testing machine, we planned to generate revenue of about 17 lakhs.

As per above planning our target is to achieve 50 to 75 lakhs per year.

For above planning we have starts to trained our existing teaching staff in CNC machining, CAD-CAM & Adv.welding training. These training will be completed upto June 2009.
